PROJECTS

The Sound Project Music player website —

Technologies Used: React.js, Tailwind CSS, JavaScript

Developed a modern and responsive music player web application with React and Tailwind CSS. The app features a clean UI, interactive audio controls (play, pause), and a dynamic playlist interface. Designed with component-based architecture and optimized for mobile and desktop devices.[sound music](#)

Web Development Learning Platform

Technologies Used: React.js, Tailwind CSS, JavaScript

Developed a responsive and user-friendly frontend-focused learning website to help users understand web development concepts. The platform includes sections for HTML, CSS, JavaScript, and React tutorials, along with interactive code snippets and beginner-friendly explanations. Designed with a modern UI and component-based architecture for scalability.

Skill

- **Frontend:** JavaScript, React.js, Tailwind
- **Backend:** node.js, express .
- **DataBase:** mongoDB .
- **Tools & Workflow:** GitHub, VS Code, Vercel
- **Design:** Responsive Design, Flexbox, CSS Grid
- **Programming (Basic):** C, C++, javascript .
- **Soft Skills:** Communication, Time Management, Self-Learning, Team Collaboration

EXPERIENCE

Frontend Developer (Self-Initiated Projects) | Fresher

Actively building real-world frontend web applications using modern technologies like React.js, Tailwind CSS, and JavaScript. Focused on creating responsive, user-friendly, and component-based UIs. Projects are self-directed and demonstrate applied understanding of frontend development workflows including version control, UI/UX design, and deployment.

Key Projects:

The Sound Project – Music Player Website

Tech Used: React.js, Tailwind CSS, JavaScript

Developed a modern and responsive music player web app featuring **play/pause audio controls**, a **dynamic playlist UI**, and clean component-based design. Optimized for both desktop and mobile devices.

LANGUAGE

English , Hindi
